Julio Padovan,

a Brazilian national, is an associate professor at the Department of Chemistry at York College-CUNY and a full-time researcher at the Rockefeller University in New York City. He holds several academic degrees and is a lecturer for both the physical sciences and the Spiritist Doctrine. Introduced to Spiritism at the age of fifteen, Júlio is particularly interested in studying the solid logical foundation upon which spiritist concepts are built as well as in creating a tighter association among those very same concepts.

The Spiritist Societies of Maryland, united in purpose and friendship, have come together to promote the education of the mind and heart by promoting spirituality through the understanding of the Spiritist teachings.
